

ANSH JAISWAL

B.Tech Computer Engineering | Full-Stack & AI Systems Builder

Mumbai, Maharashtra, India • +91-7498108450 • anshjaiswal2911@gmail.com • LinkedIn • GitHub

PROFILE SUMMARY

B.Tech Computer Engineering student who ships full-stack and AI systems end-to-end, from live-deployed products to a multi-agent AI platform. Active open-source contributor via GirlScript Summer of Code and campus technology leader at GeeksforGeeks and Microsoft, with two hackathon finals behind me.

KEY PROJECTS

AUTC — AI Universal Task Companion

React · TypeScript · Gemini AI

- Architected a multi-agent AI system where six specialized agents collaborate and hand off sub-tasks to solve open-ended, real-world problems — not a single-prompt wrapper.
- Designed the orchestration layer that routes each incoming task to the correct specialized agent based on context and intent.

PGT Global Network — Open-Source Contribution (GSSoC 2026)

React · TypeScript · Supabase

- Contributed production code to a live platform (pgtglobalnetwork.com) as part of GirlScript Summer of Code, India's largest open-source program, under a formal PR-review workflow.
- Built features against a real Supabase-backed auth and data layer, following an external team's contribution guidelines and code-quality bar.

Find Teammates — Live Product

React · JavaScript · Vercel

- Built and deployed a platform that helps students and developers find teammates for hackathons and open-source projects, live at *find-teammates.vercel.app*.
- Solves the exact team-formation problem hackathon participants face — designed from a real, self-identified need rather than a tutorial spec.

EXPERIENCE

Campus Mantri (Official Campus Representative) — GeeksforGeeks

Jun 2026 – Present

- Appointed as the official campus representative for GeeksforGeeks at SLRTCE, one of a limited number selected nationally.
- Drive student engagement and technical skill-building through coding events and workshops on campus.

Associate Microsoft Learn Student Ambassador — Microsoft

Jul 2026 – Present

- Promoted from Student Ambassador to Associate MLSA within the global Microsoft program.
- Delivered live Microsoft Copilot workshops and technical sessions to student communities.

ACHIEVEMENTS

- 2× Hackathon Finalist**, including NEOFuture Hackathon 2026 (SLRTCE).
- Open-Source Contributor & Ambassador**, GirlScript Summer of Code (GSSoC) 2026.

EDUCATION

Shree L. R. Tiwari College of Engineering (SLRTCE), Mumbai

2025 – 2029

B.Tech in Computer Engineering

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python

Frameworks & React, Tailwind CSS, Vite

Tools:

Cloud & Data: Supabase, MongoDB, Vercel

AI & Development: Gemini AI, Git, GitHub, Claude Code, Microsoft Copilot
